

ENHANCE THE APPEARANCE OF YOUR LASHES AND BROWS WITH RAPIDLASH.

YOUR EYES WON'T BELIEVE YOUR EYES!

In just 4-6 weeks, this innovative, safe and high-performance formula is clinically proven to promote healthy, natural lashes and brows. RapidLash is infused with vital proteins, potent polypeptides, vitamins, minerals and botanicals that nourish and strengthen your lashes and brows to fight the effects of age, environmental factors and premature fallout. This product offers fast results that help turn brittle, short or sparse lashes into fuller, thicker-looking lashes and brows!

DIRECTIONS: Using the applicator brush, apply a thin line of RapidLash to the base of the upper eyelash. Begin the application from the inner corner of the eye to the outer corner, as if you were applying liquid eyeliner. You can also use RapidLash on the lower lash line and brows. Use RapidLash in the evening before bedtime. Wait until product has fully dried before applying additional cosmetics. Once you are satisfied with the results, continue using RapidLash to maintain the appearance and condition of your lashes and brows.

Disclaimer: RapidLash is not intended for direct contact with the eye. If this should occur, rinse thoroughly with cool water.

RapidLash Key Benefits:

- **Potent Polypeptides help increase the thickness and volume!** Powerful Polypeptides provide effective protection against breakage and naturally supports stronger, more voluminous lashes.
- **Vital proteins and vitamins help replenish and fortify!** Panthenol combined with rich minerals help replenish and rejuvenate lashes with essential proteins and vitamins that provide strength and shine.
- **Clinically proven:**
 - 62% longer looking lashes!
 - 60% more curl to natural lashes!
 - 62% darker looking lashes!

PROFESSIONAL SKIN SOLUTIONS

“RapidLash definitely works! My eyebrows are full and thick and my eyelashes are a lot fuller and curlier. I love this product!”

Lisa – Age 35
Week 8

“I went to the salon and they asked me if I wanted my eyebrows trimmed. I never had any eyebrows before RapidLash!”

Tainah – Age 22
Week 8

“Everyone thinks I’m wearing fake eyelashes. They’re so long that they’re touching my glasses!”

Samanta – Age 40
Week 8

Q. How long will one container of RapidLash last?

A. If applied according to directions, one container of RapidLash should last approximately 1-2 months. Daily applications to upper lash line only will provide a longer yield than if also applied to lower lash line and/or eyebrows.

Q. How long does it take to see an improvement in the appearance of my lashes?

A. Our efficacy tests have shown it takes approximately 3 - 4 weeks before you can see a noticeable improvement in the appearance of eyelashes.

Q. Is RapidLash safe to use on the delicate skin close to the eyes?

A. Yes. RapidLash has been ophthalmologist-tested and found to be safe and non-irritating. However, as with any cosmetic product, some individuals may be allergic to one or more of the ingredients in the formulation. If you suspect an allergic reaction, discontinue use and consult with your physician immediately.

Q. What if I forget to apply RapidLash at night?

A. If you forget and skip an application in the evening, apply product the following evening. However, a consistent routine is the key to faster, better results.

Q. Does using RapidLash twice a day obtain faster results?

A. No. RapidLash is designed to help deliver fuller, healthier-looking lashes with just a once a day application and additional daily applications are neither necessary nor recommended.

Q. What should I do if I accidentally get RapidLash in my eyes?

A. In the event of direct contact with eye, rinse the eye with plenty of water. If irritation from direct contact occurs and persists, consult with your physician immediately.

Q. Is it normal to experience some tingling on my lash line when I apply RapidLash?

A. Some consumers have reported experiencing a mild sensation upon application. It should improve within a few minutes and with continuous use you should no longer experience this mild tingling. If the tingling persists or the sensation is associated with redness and/or irritation, discontinue use and consult with your physician.

Q. What happens if I stop using RapidLash?

A. Once you have achieved the desired appearance of lashes, it is recommended you continue to use RapidLash to maintain the appearance. RapidLash will continue to nourish and enhance your lashes to help keep them looking healthy and conditioned.

Q. Can men use RapidLash?

A. The product is unisex and the formula is clear and transparent which makes it ideal for men to use as well.

Q. Can I use RapidLash on my lower lashes?

A. Yes. However, use greater care when applying to lower lash line to avoid direct contact with the eye.

Q. Can I use RapidLash on my eyebrows?

A. Yes. RapidLash is beneficial for improving the appearance of thin, sparse eyebrows as well.

Q. Can I use RapidLash if I wear contact lenses?

A. Yes. RapidLash is ophthalmologist-tested and found to be safe and non-irritating, making it ideal for contact lens wearers as well.

Q. Can I use RapidLash while I have eyelash extensions?

A. Yes. RapidLash is a wonderful blend of nourishing ingredients that are suitable to use while you have eyelash extensions.

Q. My husband noticed that my lashes seemed darker after using RapidLash for just a few weeks. Is that possible?

A. The product is clear and transparent in its formulation. Due to the improved healthy condition, the lashes may appear fuller and thicker and the lash line may appear more defined.

Q. I have been using RapidLash for a while now and have noticed that the base of my eyelashes has become a bit darker. What should I do?

A. The product is not intended to darken the skin. However, a small number of consumers have reported a faint darkening of the lash line, similar to eyeliner. If the effect bothers you, please discontinue use.

Q. Would RapidLash help if I have undergone radiation treatment and as a result my eyelashes and brows are very sparse?

A. Yes. We have been told by consumers who have undergone such treatment that with regular use of RapidLash the overall appearance and condition of their lashes and brows has improved.

Q. Can I use RapidLash if I am pregnant or breastfeeding?

A. We recommend that you discuss use of this product with your physician if you are pregnant or breastfeeding.
